Clicks, downloads, and form submissions **increase by 60%**

**VIDEO VIEWS**

Video views and video starts **increase by more than 1,000%**

**SOCIAL MEDIA**

Facebook and Instagram reach **increase by more than 80%**

**2024 KEY EFFORTS AND APPLICATION OF RESOURCES**

- Expanded web-based resources about genetic clotting disorders, including factor V Leiden and other common forms of thrombophilia.
- Created a suite of new resources focused on thrombophilia and the emerging promise of genetic testing in contraception decision-making.
- Created additional educational tools, including checklists, infographics, videos, and a Q&A, to build awareness about women's health and clotting.

**2025 STRATEGIC AIMS AND PLANNED ACTIVITIES**

- Create new resources to increase understanding about hormonal versus nonhormonal contraception options.
- Expand inventory of resources with new educational videos and infographics about women's health and clotting, emphasizing person-centered decision-making.
- Amplify awareness among the public and healthcare professionals to help improve contraception decision-making and outcomes related to safety and effectiveness.
